Scales & Welsby, Printers, Prescot.

# PRESCOT URBAN DISTRICT COUNCIL.

---

The Chairman and Members of the  
Prescot Urban District Council.

Ladies and Gentlemen,

I have the honour to submit to you my Annual Report on the health of Prescot Urban District for the year ended 31st December, 1956.

I am happy to report that the health of the community has remained satisfactory during the year.

The adjusted death rate at 14.1 per thousand compares favourably with that for England and Wales (11.7).

The birth rate of 15.7 per thousand shows a decrease compared with the previous year (16.5). It was the same as the rate for England and Wales (15.7).

There was a decrease in infant mortality, 4 deaths being recorded compared with 9 during the previous year. Of these deaths 3 occurred before the age of one month.

The incidence of infectious disease showed reduction compared with the previous year. There were more cases of measles and whooping cough but a decrease in the number of cases of scarlet fever. No cases of poliomyelitis were notified and there were no cases of diphtheria.

During the year continued attention was given to the problem of sub-standard property and in consequence 38 houses were demolished.

I should like to take this opportunity of expressing my appreciation for the assistance I have had from all members of the Council and in particular Mr. C. J. Hulme.

I am, Ladies and Gentlemen,  
Your obedient Servant,  
F. W. BUNTING.
